

DISTRICT OF LANTZVILLE

Low Flush Toilet Rebate Application Form

Help our community and the environment conserve water

There is a long term trend of diminishing water levels in the Quadra Sands aquifer, which is Lantzville's only water supply. It costs money to treat and supply the water going to your house. Using less water saves money and is better for the environment. By cooperating in this initiative you will ultimately save Lantzville money and more importantly, assist in keeping water rates down.

Many homes are equipped with older toilets that require 13 or more litres per flush. New low flush toilets require only 6 litres per flush while dual flush toilets use between 3 to 6 litres. By replacing your old toilet, you could use up to 1/3 less water. That could save more than 200 litres per day or 70,000 litres per year.

The District of Lantzville is offering a lifetime maximum of two (2) rebates per residence. Replacing toilets using 13 litres or more, with a CSA approved new low flush model will earn you a rebate. District of Lantzville staff will review your application and, if you qualify, will mail you a cheque \$60 for a low flush model (6 litres) & \$100 for a dual flush model (3/6 litres).

The District of Lantzville will provide a \$40 rebate for those property owners who install dual flush toilets (3/6 litre) during new construction as an alternative to the low flush models. There is no maximum for this incentive.

NOTE: You must agree to permit a representative of the DOL to access your property to inspect the installation if requested.

Simple toilet replacements DO NOT require a plumbing permit. However, if you are performing renovations, you must apply for a building permit.
