Phase III Sanitary Sewer Collection System Project

UPDATE: The Archaeology Branch of the Ministry of Forests, Lands, Natural Resource Operations and Rural Development, has authorized a Heritage Inspection Permit to conduct inspections for an archaeological impact assessment of the District's Phase III Sanitary Sewer Collection System proposed route. This will allow the design to be finalized and the project to proceed. Next step is to tender the construction contract (September/October). More information on the cost and construction schedule will be known after the tender is awarded. Thank you to the property owners within the Phase III Sanitary Sewer Project Local Area Service for your patience.
